

Survey report on Emerging Trends in low code application development

Aim:

To study the emerging trends in low Code application development and understand how low code platforms are changing the software development process.

Emerging tools:

1. AI assisted development
2. Mobile application development
3. Cloud Based Development
4. Workflow automation
5. Integration with API
6. Citizen development

Advantages:

- * Fast development
- * Easier Maintenance

Result:

The emerging tools in Low Code app development were survived and understood
